

## **SUMMARY** (Acorn Projects)

**Group Members: Penelope Sanchez, Derek Earl, Vishnu Soranam**

### **Disciple of Jesus Christ**

- We have been able to increase our knowledge of the gospel. In addition, we were able to develop a stronger testimony in Jesus Christ that have helped us to overcome challenges that we faced. This activity has also motivated us to be more eager to pray daily to better understand the gospel so that we can apply it to our daily lives.

### **Sound Thinkers**

- The ability to think outside the box showed our potential in creativity, such as recognizing or refining our ability to solve difficult puzzles and even riddles. In this way, we were able to increase our critical thinking skills. In addition, the two main skills we also developed are problem solving and help memory. We believe that most companies should worry about recommending this type of activity to improve the work environment.

### **Effective communicator**

- Learning to be a better communicator has helped me to engage well and effectively in group discussions. The key to excellent teamwork starts with how well we communicate and engage in conversations to establish team unity. For some of us, English is not our main language, so the videos on how to improve our communication skills were helpful. After this activity, we increased our confidence when speaking in public. In addition, we increase my vocabulary, and exchanging ideas with our classmates helps us improved our communication efficiency.

### **Skills Collaborators**

- We have been able to improve our communication and leadership skill by applying the takeaways we get from the workshops we attended. We see ourselves being able to communicate more confidently and smoothly in group discussions and conversations. This project has helped us to make and get the best out of group discussions to contribute to the progress of accomplishing desired goals for our projects.
